Q: The Guidance provides that eligible expenditures may include expenditures related to the provision of grants to small businesses to reimburse the costs of business interruption caused by required closures. What is meant by a “small business,” and is the Guidance intended to refer only to expenditures to cover administrative expenses of such a grant program?

A: Governments have discretion to determine what payments are necessary. A program that is aimed at assisting small businesses with the costs of business interruption caused by required closures should be tailored to assist those businesses in need of such assistance. The amount of a grant to a small business to reimburse the costs of business interruption caused by required closures would also be an eligible expenditure under section 601(d) of the Social Security Act, as outlined in the Guidance.

Q: The Guidance provides that expenses associated with the provision of economic support in connection with the public health emergency, such as expenditures related to the provision of grants to small businesses to reimburse the costs of business interruption caused by required closures, would constitute eligible expenditures of Fund payments. Would such expenditures be eligible in the absence of a stay-at-home order?

A: Fund payments may be used for economic support in the absence of a stay-at-home order if such expenditures are determined by the government to be necessary. This may include, for example, a grant program to benefit small businesses that close voluntarily to promote social distancing measures or that are affected by decreased customer demand as a result of the COVID-19 public health emergency.

Q: Must a stay-at-home order or other public health mandate be in effect in order for a government to provide assistance to small businesses using payments from the Fund?

A: No. The Guidance provides, as an example of an eligible use of payments from the Fund, expenditures related to the provision of grants to small businesses to reimburse the costs of business interruption caused by required closures. Such assistance may be provided using amounts received from the Fund in the absence of a requirement to close businesses if the relevant government determines that such expenditures are necessary in response to the public health emergency.

Q: Must a State, local, or tribal government require applications to be submitted by businesses or individuals before providing assistance using payments from the Fund?

A: Governments have discretion to determine how to tailor assistance programs they establish in response to the COVID-19 public health emergency. However, such a program should be structured in such a manner as will ensure that such assistance is determined to be necessary in response to the COVID-19 public health emergency and otherwise satisfies the requirements of the CARES Act and other applicable law. For example, a per capita payment to residents of a particular jurisdiction without an assessment of individual need would not be an appropriate use of payments from the Fund.
